To: House Corporations Committee
Subject: H-7015 supporting bill as drafted

To the Speaker of the House

My name is Charles Lena and I'm a licensed journeyman wireman electrician here in the state of Rhode Island. I stand in support of qualified persons performing solar and all electrical installations. The National Electrical code exists to protect life first, then property. I respectfully ask that this not be undermined for the sake of greed. For this reason I ask that the bill H-7015 be passed as drafted.

Thankyou for time .
