Subject: Testimony in support of H-7015 as drafted

Dear sir , i am a licensed electrician in our state and I completely agree with our licensing law. I, as well as all other electricians in this state, have worked years to achieve the license and qualifications to be a safe and experienced electrician. Circumventing this process could put our citizens at risk because of negligence and inexperience in our field . Please please please pass H-7015 we all depend on this.

Respectfully, Dave Watson (lifetime resident of R.I.)
