**Subject:** Regarding H-7015

I would like to Testify in support of H-7015 as drafted. As a career licensed electrician and licensed master electrician I can and will attest to the importance of regulating (by licensing and testing) both electricians and those inspecting electrical work in the state. I cannot begin to express the severity and the safety of all whom may be affected by the non compliance of the National Electrical Code. Throughout my forty years I have been exposed to and seen the dangerous electrical installations performed by non licensed and non trained personnel. I have also been in residence's of friends who have had home inspections by non licensed electricians. And I have pointed out many violations and outright safety issues that have been missed. Let's make our State a safe place for all. Let's pass H-7015.

Sincerely James Zuffoletti
