To All That May Be Concerned:

I write to register my **support** of Bill S2877/H7212.

While Natural Organic Reduction is not a choice for everyone, it provides an alternative to those who do not subscribe to the "traditional" ways of handling death & burial.

It was not so long ago that cremation was a novel concept. It has become an acceptable & favored option to those who prefer a different way of dealing with death & burial.

Let Rhode Island be a leader in offering this choice to its citizens.

Respectfully,  
Deborah Capoverde
