

H5098 In Opposition

Chair Representative Bennett and Members of the House Committee on the Environment and Natural Resources,

My comments are submitted to the Committee in opposition to H5098.

Forest harvesting is not on equal par with agricultural farming, as H5098 attempts to artificially design.

I agree with the comments submitted by Jane Austin in opposition to H5098, which are so articulately drafted.

I respectfully urge the Committee to vote unfavorably for H5098.

Thank you.
