Subject: Fwd: Bill H5099

Dear Mr. Mansolillo,

Kindly accept this written testimony in support of H5099 to be addressed at the House Environmental and Natural Resources Committee and add it to the day's documents. I encourage the Department of Transportation to plant pollinator-friendly, native species of trees, shrubs and plants within limits of roadways, including state highways. Bees, butterflies, hummingbirds and insects are in decline due to habitat loss, climate change and disease. We need to support our local ecosystems wherever possible, and I fully SUPPORT Bill H5099.

Thank you,
Allison Spadone, Providence
