Subject: Testimony SUPPPORTING H7969

Dear Chair Donovan and Members of the House Committee on Health and Human Services, my dad was in Lincolnwood rehabilitation and nursing home for 2 plus years for rehab and then he was basically stuck there because I was all he had and I was working full-time and he couldn't be home by himself but while he was there, people never answered the call button one time I was there just tested out and it took three hours for somebody to come. He fell and fractured his hip and basically with his huddle and had to get stitches his roommate apparently fractured pelvis or something in December I got laid off and I decided I'm gonna bring them home and apply to be his caregiver. He had had heart attack and he's almost 90 so did not answer the call button and he could have been having a heart attack. There was one CNA there that was amazing when she was working but that was it. Somebody sent me a message about attending a hearing which I can't do because I am a caregiver but she sent me this email to submit this information

Thank you for the opportunity to submit testimony in support of House Bill 7969.
