Re: H.6117, An Act Relating to Insurance – Accident and Sickness Insurance Policies
H.6118, An Act Relating to Insurance – Accident and Sickness Insurance Policies
H.6158, An Act Relating to Insurance – Accident and Sickness Insurance Policies

Dear Chairwoman Donovan,

The undersigned members of the Rhode Island Business Coalition have concerns relative to the passage of the above-mentioned health care bills that would enact additional health insurance mandates and restrictions on insurer cost containment initiatives.

For the past several years, the Coalition has expressed concerns on bills such as these because they increase the number of new health insurance mandated benefits and costs to Rhode Island's health system. These costs are disproportionately borne by small employers, their employees as well as Rhode Islanders who purchase coverage through the individual market, who are often least able to afford the premium increases. The reason for this is larger employers who self-insure their health benefit plans are not subject to state health insurance mandates.

Affordability is a significant concern for Rhode Island small employers. An analysis of National Association of Insurance Commissioners (NAIC) data by the Rhode Island Business Group on Health, showed the Rhode Island small employer market has seen a 53 percent drop in covered lives from 2012 to 2022. A recent analysis of the Rhode Island health insurance market by Oliver Wyman conducted for the Office of the Health Insurance Commissioner (OHIC) showed significant decreases in membership in both the large and small group fully insured markets since 2020. The large group market experienced the largest overall decrease of 18.4% while small group saw an 11.1% during this period.

The Coalition believes that new proposed health insurance mandates should be accompanied by a cost-benefit analysis conducted by OHIC. The bills outlined below could be studied to provide the legislature with an analysis of the efficacy of new mandates while also providing a cost impact.

- H.6117 requires insurance coverage for all community health workers' services to include health and promotion coaching, health education and training, health system navigation and resource coordination services, care planning and follow-up care recommendations.

The Rhode Island Business Coalition represents 50 industries and 6,280 businesses that employ 231,200 people throughout Rhode Island.

- H.6118 requires coverage for acute mental health crisis mobile response and stabilization services to eligible individuals enrolled as plan beneficiaries.
- H.6158 mandates insurance coverage for scalp cooling treatments for breast cancer patients undergoing chemotherapy to prevent hair loss during chemotherapy treatments.

While we appreciate the desire to assist individuals facing difficult health challenges, we do not know the number of individuals that would be covered under all these new programs, the costs associated with the benefits, and the potential impacts on the availability of services to groups already covered should any of these mandates pass into law. Approaching healthcare and health insurance policy in a piecemeal fashion leads to increased costs for businesses and individual subscribers. For many years, the Rhode Island General Assembly has passed legislation adding mandated health insurance benefits that have increased the cost of individual, small and large group health insurance premiums across the state.

As mentioned above, the Rhode Island Business Coalition urges the General Assembly to create a mandated benefits review committee, comprised of experts from various stakeholder groups. That group could then evaluate all the submitted proposals and provide meaningful data to assist the General Assembly in its health care policy deliberations.

Sincerely,
