RI House Judiciary Committee,

Please support these shoreline access bills.

(2024-S 2641, 2024-H 7645) would require a municipality, when abandoning a road, to vote on whether or not to preserve an easement for walking or other types of recreation. Under current Rhode Island law the only option for a municipality that does not wish to maintain a road is to abandon it totally to the abutting private property owners.

(2024-S 2634, 2024-H 7750) would allow CRMC to protect historical footpaths used for shoreline access through official designation.

(2024-S 2185, 2024-H 7376) would educate new buyers of oceanfront property on Rhode Island shoreline access law and require disclosure of any permits or conditions of public access tied to the property, in order to avoid surprises that might come up. A recent dispute over public access of a seawall shows that this disclosure is currently lacking.
