**Flag Status:** Completed

Hello Chairman Craven, and House Judiciary Committee Members,

My name is Dennis Varone II, a resident of Richmond, RI and I am writing this testimony in opposition of HB 5436, HB 5443, HB 5651, HB 5652, HB 5654, HB 5889, HB 5890, and HB 5891.

Most notably, HB 5436 - An "assault weapons" ban to prohibit the future possession, purchase, sale, control, and manufacture of commonly owned firearms.

This bill is egregious and overreaching in many respects:

- Illegal Firearm Registry

H5436 (page 5, lines 28-34) mandates a gun owner registry, which is explicitly prohibited under Rhode Island law (Title 11, Chapter 11-47, Section 11-47-41). This statute forbids any government agency from maintaining a list of privately owned firearms or their owners, except in cases involving violent crimes or convicted individuals. Forcing law-abiding citizens to register their firearms—or face felony charges after 90 days—is a clear violation of state law and an arbitrary abuse of power.

- Ineffective and Overbroad Feature Bans

The bill's feature-based restrictions lack any basis in reducing firearm lethality and instead rely on fear-driven misconceptions. Consider the following:

- Weight Restrictions (>50 oz): This targets pistol variants of rifles (e.g., AR-15, AK-47) but also bans many common revolvers and semi-automatic handguns (e.g., .44 Magnum, .50 cal) designed to be heavier to mitigate recoil. This contradicts claims that only specific firearms are affected.
- Threaded Barrels: These are being targeted for their association with suppressors (already unreasonably illegal in RI) but are also used for compensators, which reduce recoil for new or recoil-sensitive shooters. Nearly all semi-automatic rifles and shotguns (via choke tubes) feature threaded barrels, making this a de facto ban on most firearms, including semi-auto shotguns nearly every hunter/sportsman uses.
- Shrouds: Defined (page 2, lines 22-24) as anything encircling the barrel to protect the non-trigger hand, this vague language bans virtually every semi-automatic rifle—since a handguard is essential for safe operation. These features are also on every bolt action rifle and even black powder rifles, which typically use far more powerful cartridges than found in handguns and "assault weapons"
- Magazine Placement & Buffer Tubes: Most semi-automatic and many bolt-action rifles accept magazines outside the pistol grip. Buffer tubes, critical to AR-15 function, are also targeted, alongside stocks or braces on countless other firearms.

These restrictions do not enhance safety; they criminalize standard, widely owned firearms based on arbitrary traits.

- Criminalizing Possession of Parts

Page 2, lines 33-34, make it illegal to possess parts that could assemble an "assault weapon," even if unmounted. This vague provision turns ordinary Rhode Islanders into felons for owning common components, with no public safety benefit.

- Practical and Constitutional Concerns

Beyond its illegality under state law, this bill infringes on constitutional rights and disproportionately harms law-abiding citizens. Feature bans like flash hiders (which mitigate, not eliminate, muzzle flash) or choke tubes (standard on shotguns) serve practical purposes, not criminal ones.

I urge you to oppose these unconstitutional bills. Partisan politics aside, Rhode Islanders deserve representation that respects their rights and the law.

Thank you for your time and consideration.

Dennis S. Varone II  
Richmond, RI
