"Second Look Act"

From Someone who was directly impacted from a sentence Reduction (Rule 35). I was sentenced to 40 years with 25 to serve and the remaining 15 suspended /Probation. While this was devastating to me, I know what I had to do. In "2014" I not Just got my G.E.DI also recived a extra certificate for Achievement (For reciveing one of the highest score in the State). I also completed more than 10 programs not including the College courses I was also involed in and that I completed. Me personally I knew I had to Change I was not willing to declare defeat and let this bad monment and situation brake me. You can say I had an epiphany, a wake up call. So the Same Judge that sentenced me Reduced my sentence to 37 years with 22 years to serve and the rest 15 years suspended Probation. While a Combination of things played a part like my family Support, behavior, my willingness to seek rehabilitation, and my ability to be Resilient.

I came to prison in "2013" and recived a Sentence Reduction in "2019", Now I say this to tell you "Senator Chair person Dawn Ever", and "Representative Chair person Robert E. Craven, Sr." that I was able to Change and grow as a man with a different way of thinking in less than Six(6) years. I magen how much someone can change in ten years, or how much they can a complish. Now I had to File my Sentence Reduction (Rule 35) in the 120 days window. What about those who aren't educated with the law, Should they be deprived of a "Second Look"?

Respectfully, ade moz ID*138348

I've been in prison for llyears and 4 months and am serveing a 22 year sentence. Since I've been here the Phone system has changed mutiple times. I have an awesome relationship with my family and it's very important for me to keep in Contact with them. I also have a son who I call everyday which is important to me so I can have a good father - son relationship and to give him advice. I really don't know how it would feel to be without bearing able to Speak to them. I do know this it's expensive for them out in Society the economy its not that well and they (My Family) are the one's who pay for my phone Call's. Now in here I work in the Gym and only get paid two(2) dollers a day which is approximately \$60.00 a month and they take out Vois so I stay with \$45.00. How can I buy clothes, hygine, Food and everthing else that I would need to Survive in here and be able to put funds on my PhonesIF I don't have that connectfor with my love one's I don't know what would be my mental health and that would effect my attitude.
