

Apologies for leaving this out! I live on campus this semester and housing next year is not guaranteed for me or my roommates

Hi my name is Zachary Capen.

I am a sophomore at URI and I have struggled with looking for housing with my 3 roommates because of the Narraganset Ordinance. Me and my roommates are quiet people. We are Computer Science, Mechanical Engineering and Supply Chain Majors and this ordinance has restricted us from finding a place for all of us without separating and spending enormous amounts of money to pay for a house that was meant to be for more than two or three people. The state bill H7382 would help us and many other students who just want to know where they can live next semester find that space and not spend a fortune doing so!

Thank you for your time!
