

Testimony in support of H5450: All Electric Building Act

Barbara Walsh. 62 Frederick Street, Warwick, RI 02888

Date of Hearing: March 20, 2025

To: Chair Casey and the honorable Members of the House Municipal Government and Housing Committee

Please support this bill. It is critical that the effects of climate change due to the burning of fossil fuels be addressed for the sake of this planet and all living on it. We are in a state of emergency and all actions should be taken to remedy this crisis. Buildings emit a large percentage of greenhouse gases, yet we have a remedy for this. The building sector must change the status quo and build differently in order to reverse the dire consequences of continuing to burn fossil fuels. This is a reasonable and timely bill. Please take the corrective actions necessary by passing this bill.
