

To House Committee Municipal Government & Housing,

My name is Jason Romblad, I am an unaffiliated voter from Woonsocket. I am providing my testimony today in opposition of bill H5450.

I find it unsurprising as our newly elected POTUS is working to lower the price of energy for Americans, that the current RI Legislature is trying to pass laws that will increase energy prices. This law to ban fossil fuels, on new construction buildings, will also benefit Chyna, as the majority of solar panels are built there.

Why is this legislature so anti-American?

Please vote no against this bill.

Thank You.

Jason Romblad
