

Hello committee,

I'm in favor of H7386. So why are we here?

Others are trying to mix the intent of the free public library.

What did Ben say about this fix? "to benefit the common poeple who otherwise would not have access to books".

Oh my---so who do we need H7386? To come to grips with the nitwits who want to nix the people's freedom to read what they want--

**\*NO CENSORSHIP PLEASE\***

Fiddlesticks I say to those who want to restrix the free flow of knowledge and ideas---so

Let's pass H7386 and let libraries get back to the business of teaching and openmindedness and not get mix-ed up in the gqp and religious efforts to dumb down the public. (oppressors prey on the lazy, freedom comes to the hardworking).

Thanks for your attention,

Susan Razza, volunteer The Womxn Project
