To: House State Government and Elections Committee
Subject: Support for H5275 and 5276

Ww would like to voice our support for both of these house initiatives. Ranked Choice Voting has been around for over 100 years and there is more than sufficient evidence that it would provide greater representation and participation in our democracy than the current approach to plurality voting. Please prioritize these efforts as they can positively impact how our government functions and help the majority coalesce around solutions to our complexity of issues.
