

To whom this may concern,

I am writing to urge you to support the passage of a constitutional Green Amendment that will add to our state constitution's Bill of Rights/Declaration of Rights, the right of all people to a clean, safe and healthy environment; and that these rights are protected equitably for all communities in our state regardless of race, ethnicity, socioeconomics or generation.

Our rights to clean water and air; to healthy soils, ecosystems and environment; and to a stable climate, are inherent and inalienable fundamental rights retained by the people of all generations. It is essential that our constitution both recognize and protect these fundamental human rights. There can be no life, liberty, or happiness without a healthy environment.

In light of all the dramatic changes with regards to our environment, there is no question that environmental issues will dominate the 21st century. I urge you take leadership and help guarantee the safety of the public by passing a constitutional Green Amendment securing our environmental rights.

Sincerely,

Cynthia Veasey

Narragansett, RI 02882
