Subject: CRMC

I am writing to express support for either H5706 or H5453. Unfortunately I am traveling and cannot join the meeting tonight.

Our coastal resources are a crown jewel of the State and critical to our environment. Having political appointees has undermined the effectiveness of CRMC, has led to inconsistent enforcement and has lead to a (deserved) lack of trust in all processes CRMC. It is critical that trust be restored and the CRMC be reformed and professionalized.

I would favor H5706 given the importance of the work done by the CRMC and the importance I place on this body being entirely independent and transparent.

Thank you for your consideration.
