

FACTORY BUILT HOMES

P E R M A N E N T I M M O V E A B L E S T R U C T U R E

Company Description

WELCOME TO OUR CONSTRUCTION

Building from our business in manufacturing and erecting Modular Event Structures we then took that method of build and are now one of the leading Modular and Factory Built homes in Ireland.

BRB strives by putting Client needs are first and foremost. In an ever challenging and evolving environment we work to find the best solution for clients. Our flexibility of design & "One Stop Shop" option together with our team of skilled & dedicated trades ensure a proficient service from beginning to end.

At BRB, we specialize in the design, manufacture, and assembly of high-quality of factory built structures. Building on our foundation in modular event construction, we have become one of Ireland's leading providers of modular and factory-built homes.

“We use only the highest-quality materials available and back every structure with a 25-year structural warranty”

WHAT DO YOU KNOW ABOUT US?

As all our structures are manufactured and assembled by BRB employees, it guarantees consistency and quality.

We use the highest quality of materials available and offer a twenty-five-year structural warranty, the longest guarantee period you will find in the market presentation power point make it for this

OUR ADU PROJECTS.

In today's fast-paced world, modular homes offer a practical solution to housing shortages, urban density, and environmental challenges.

Their adaptability makes them ideal for various applications single-family residences, affordable housing, vacation homes, or even urban infill developments.

The growing emphasis on sustainability, affordability, and efficiency has positioned modular homes as a cornerstone of future residential development. They represent not just a shift in how we build, but in how we think about living spaces flexible, eco-conscious, and designed for the modern lifestyle.

OUR VISION

We have come up with an alternative solution to the lengthy and costly conventional block-built home. Using modern methods of steel-frame construction from fully and independently certified designs, the off-site manufacturing process significantly reduces overall construction time and cost. As well as being more affordable, these factory-built homes are a much quicker option. These types of build also meet all building and planning regulation as they are a permanent structure.

*Commitment to excellence,
durability, and customer
satisfaction*

01.

Are our homes made for High Winds ?

Our homes are built to withstand the highest levels of winds and are not constructed with light grade steel materials. We have homes constructed for many years in areas right across the country including, seaside locations which experience very strong storm force wind levels.

02.

How long do your homes last?

Our A Rated homes are designed to last as long as a conventional concrete block-built home

03.

Can I custom build?

We have a fantastic design team here at Byrne Rapid Build and understand that 'one size does not fit all'. We give each customer the opportunity to either tweak an existing design or work with our design team to come up with a bespoke option to create their dream home.

“Our success comes from our people. The dedication and craftsmanship of our team ensure that every client receives a product of the highest standard.”

BRB HOMES: TURN-KEY PROCESS OVERVIEW

1. Design Consultation

We start with your vision custom plans, finishes, and budget alignment.

2. Planning & Engineering

Permits, design approvals, and code compliance handled by our team.

3. Factory Build

Precision-built in a controlled environment with full quality checks and insulation systems that exceed standards.

4. Delivery & Assembly

Modules transported, craned, and secured on-site for fast setup and perfect alignment.

5. Finishing & Turn-Key Handover

Interior and exterior finishes completed to spec move-in ready with warranties and final inspection.

6. Quality & Compliance

Every home meets or exceeds factory-built and local regulations, ensuring lasting performance and comfort.

Founder Profile

DONAL BYRNE

Built on Experience. Driven by Quality.

BRB Homes was founded by Donal Byrne, a seasoned builder with over years in residential and modular construction.

Donal set out to redefine home building by combining traditional craftsmanship with modern, factory-built precision.

Donal built BRB Homes on three key principles:

Integrity: Honest communication and reliable timelines.

Quality: Every home meets the highest building and insulation standards.

Innovation: Using modern building methods to deliver efficient, affordable, turn-key homes.

From concept to completion, Donal remains hands-on in every project ensuring each BRB Home reflects the company's commitment to durability, comfort, and craftsmanship.
